⁴⁸ Note: The dearth in current state-by-state workforce data makes clear the need for critical data on compensation, working conditions including safety issues, academic degrees held, education and training received, and factors contributing to turnover. To address this, CWLA is calling for Congress to authorize the National Academy of Sciences (NAS) to conduct an updated study on the child welfare workforce. It would make recommendations regarding caseloads and workloads, education levels, and training requirements. In addition, the study would examine data reporting and collection and make recommendations on how states might improve these efforts.
